PROFILE

A full-stack developer with a strong track record of shipping production-grade web applications from a Kubernetes-deployed competitive programming judge to fintech-adjacent e-commerce platforms. Comfortable across the full stack (React, Next.js, FastAPI, Laravel) with hands-on experience in containerisation, distributed systems, and cloud-adjacent infrastructure. Driven by ownership, fast iteration, and learning directly from experienced engineers in high-impact environments.

EDUCATION

BSc in Computer Science & Engineering | United International University June 2022 – Present | CGPA: 3.4 / 4.0

PROFESSIONAL EXPERIENCE

Lead Developer | JudgeX (Competitive Programming Judge Platform) judgex.uiucomputerclub.com

FastAPI | Next.js | PostgreSQL | Redis | Docker | K3s (Kubernetes)

- Designed and built a production online judge platform capable of securely compiling and executing untrusted user code in isolated Docker containers, enforcing resource limits and sandboxing.
- Architected a distributed submission queue with Redis and a FastAPI backend, ensuring reliable job processing and low-latency verdict delivery under concurrent load.
- Deployed the full platform on a K3s (lightweight Kubernetes) cluster, gaining hands-on experience with container orchestration, scaling, and infrastructure reliability.
- Integrated a Next.js frontend with a PostgreSQL database for user management, problem sets, leaderboards, and contest tracking.

Backend Lead | Boikothok (Book E-Commerce Platform) boikothok.com

PHP | Laravel | MySQL | JWT | REST APIs

- Architected the full backend: database schema, JWT-based authentication, and RESTful APIs powering both the web platform and mobile app.
- Designed APIs for product management, user operations, and order processing — with a focus on security, reliability, and scalability.
- Collaborated cross-functionally with frontend and mobile teams, taking end-to-end ownership of backend delivery.

Full-Stack Developer | Robohub BD robohub.com.bd

Laravel | Bootstrap | Payment Gateway Integration

- Built and shipped an e-commerce platform with secure payment gateway integration, serving 2,000+ active customers in the robotics and electronics market.
- Took full ownership of the deployment pipeline and production release from development to launch.

Lead Developer | UIU Computer Club Website computerclub.uiu.ac.bd

React.js | Tailwind CSS | Laravel

- Led the full redesign and implementation of the official club portal, introducing component-driven architecture and improving maintainability.

Frontend Developer | UIU CSE Fest 2025 Site csefest.uiu.ac.bd

React.js | Tailwind CSS

- Collaborated in a 4-member team to deliver the event marketing site in under two weeks; integrated schedule, registration, and sponsor dashboards.

Frontend Lead | UIU Finance Forum Website

HTML | CSS | Bootstrap | JavaScript

- Spearheaded a UI revamp that improved session duration by 30% and streamlined the new-member onboarding workflow.

Author | C-Structure Open-Source Library

C | Data Structures | Open Source

- Built a C standard library extension providing STL-like generic dynamic arrays, linked lists, and hash maps — demonstrating deep understanding of CS fundamentals and memory management.

TECHNICAL SKILLS

Languages: JavaScript / TypeScript | PHP | C / C++ | Java | SQL

Frontend: React.js | Next.js

Backend & Databases: FastAPI | Laravel | CodeIgniter | REST APIs | JWT Auth | PostgreSQL | MySQL | Redis

Infrastructure: Docker | Kubernetes / K3s | Git | GitHub

Tools & Other: Figma | Adobe Illustrator | Team Leadership

ACHIEVEMENTS & ROLES

- 2nd Runner-Up — Innonation, 24H National Hackathon (demonstrates problem-solving under pressure and startup mindset)
- 1st Runner-Up — UIU CSE Project Show, Fall 2025
- Head of Development Wing — UIU Computer Club (2022–Present)
- Head of Events — UIU Finance Forum (2022–Present)
